

Statewide+ Organization with local offices/service locations that meet new Local Rules:

A new field in the system to deal with this without the organization having to get new codes. They should all apply with the address for the main office and current CFC code on the first page of the application. On Attachment A, they should list the service address that is specific within the campaign they are applying to if it is not the local campaign for their coded address. There will be a new field in the charity registry for “service address”. This will be where you would enter the address that is local to your campaign – the county is a required part of this data. As long as the service address is local to your campaign, they can also be listed in your campaign without having to get a new code.

(OPM will be going over this at the training in Texas next week which we will be attending – any additional clarification learned will be added to this document by end of February)
